

ELECTRONIC PRODUCTS

E01-E02

RSP SERIES AC/DC SWITCHING POWER SUPPLIES

Switching Power Supply

- >high power density, low temperature rise, high efficiency, no need for an external filter and electrolytic capacitor
- >digital display, high stability, long service life
- >built-in over current protection, over voltage, under voltage and short-circuit protection
- >small size, flexible installation

Relay And Optocoupler

- >optocoupler transmission with small signal loss, high switching frequency, no contact jitter, no worn switch, vibration resistance
- >optocoupler product without mechanical component, with long service life, insulated, highly voltage resistance
- >relay load with large switching current, optional multiple contact forms

Signal Isolator And Transmitter

- >enclosed structure, strong vibration resistance, high flame retardant grade
- >unique circuit shielding technology, good anti-jamming ability
- >low power consumption, low temperature drift, short response time

General information

RSP Switching power suppliers from Chengdu Reliance are widely used in process automation industry, electric power industry, transportation industry, machinery industry, communication industry and so on.

Features

- Wide input voltage (85VAC ~ 264VAC), wide application field.
- High power density, low temperature rise, high efficiency and no need for an external filter and electrolytic capacitor.
- Input is set with EMI filter, which has the strong ability to suppress interferences.
- highly stable output voltage, potentiometer adjustment available
- digital display, improving products' competitiveness
- high stability, long service life, authoritative certification
- compact structure design, small size, light weight, saving installation space and transportation cost
- flexible installation
- high energy saving and low no-load ratio

Overall Dimension

Terminal blocks with optocouplers

General information

- Terminal block type structure, space-saving
- RTR35 and RTR32 mounting type
- Small signal loss, high switching frequency, non-contact chatter
- Non-worn switch, vibration-supportive, flexible mounting position
- Non-mechanical component, highly insulation withstand voltage

Universal type

Model implication

RET VDC O R L

- ① Configuration: Terminal block type
 ② Rated input voltage: 5VDC 12VDC 24VDC 110VDC 220VDC
 24VUC 110VUC 220VUC

- ③ O for optocoupler
 ④ R for positive going
 ⑤ Max. output current: 20mA 50mA 100mA 300mA 500mA
 ⑥ Output voltage: L for 5V-48VDC or 24VDC
 M for 110VDC
 H for 48V-220VDC
 ⑦ Output type: None for NPN type; P for PNP type.

Technical data

Insulation parameter

Rated voltage	300V
Rated impulse voltage	4000V
Pollution secerity	3
Clearance and creep distance	≥3mm
Operating temperature	-10°C~+55°C
Storage temperature	-25°C~+70°C
Conductor cross-section	0.5~1.5mm ²
Tightening torque range	0.4~0.6Nm

Insertion bridge	Type	Order No.	End cover	Type	Color	Order No.

Electric diagram

PCB board bases with optocoupler

General information

- Easy to be installed and disassembled
- RTR35 and RTR32 mounting type
- Max. output current at the load end is 3A.
- With LED indicators for power status
- Be subjected to RoHS compliance

Technical data

Insulation parameter	Input
Rated voltage	300V
Rated impulse voltage	4000V
Pollution secerity	3
Clearance and creep distance	≥3mm
Operating temperature	-10°C~+55°C
Storage temperature	-25°C~+70°C
Conductor cross-section	0.5~1.5mm ²
Tightening torque range	0.4~0.6Nm

Electric diagram

Overall dimension

General information

- Ultra-thin, thickness 6.2mm
- Rational construction, wide range in application
- Components of relay can be replaced.
- Various specifications with indicators devices

Model implication

RRF Z
 ① ② ③ ④ ⑤

- ① RRF series ultra-thin relays
- ② Rated input voltage: 5VDC 12VDC 24VDC 48VDC 110VDC 220VDC
- ③ Signal types: D for direct current; A for alternating current; UC for directing and alternating current.
- ④ Contact form: Z for one set of switching
- ⑤ Load types: N for normal type; L for inductive load type; S for signal type.

Terminal blocks with relay couplers

General information

- Steel wire structure with large contact pressure and self-locking
- Easy to be installed and dissembled
- RTR35 and RTR32 mounting type
- Ultra-thin, thickness 6mm
- With LED indicators for power status
- Max. switching current at the load end is 12A.
- Used in parallel by insertion bridge
- Used together with end covers to prevent dust and humidity

Model implication

RET R
 ① ② ③ ④ ⑤ ⑥ ⑦

- ① Configuration: terminal block type
- ② Input voltage grade: 5V 12V 24V 48V 60V 110V 220V
- ③ Voltage types: DC for direct current; AC for alternating current; UC for directing and alternating current.
- ④ None for 4-pole terminal studs per level; 5 for 5-pole terminal studs per level;
- ⑤ R for relay.
- ⑥ None for normal type. T for special load type.
- ⑦ Contact forms: NC for normally-closed; NO for normally-open; PDT for changeover.

Technical data

Input

Rated input voltage	5VDC, 12VDC, 24VDC, 48VDC, 60VDC, 110VDC 220VDC, 24VAC, 48VAC, 110VAC, 220VAC
Operation voltage	DC≤75%,AC≤80%
Return voltage	DC≥5%,AC≥10%
Operation time	≤10ms(DC)/15ms(AC)
Return time	≤5ms(DC)/10ms(AC)

Dielectric strength test

Winding resistance/Contact	2000VAC/1min
Contact terminal/Contact	1000VAC/1min

Output

Max. switching voltage	250VAC/30VDC
Max. switching current (resistance load)	3A, 6A, 12A
Max. switching power(resistance load)	750VA, 1500VA, 3000VA/90W, 180W, 360W
Contact material	silver alloy
Tighten torque range	0.4~0.6Nm

Working condition

Multicircuit relay modular

General information

- Easy to be installed and dissembled
- RTR35 and RTR32 mounting type
- Max. switching current at the load end is 16A.
- Various contact forms are available.
- Circuit numbers 4/8/16 are available.
- With LED indicators for power status

Model implication

Signal isolators

General Information

Analog signals in industry environment are susceptible to be disturbed in transmission process. Isolator can precisely convert analog signals, reliably achieve electrical isolation and provide power adaption, which guarantees signal transmission in various kinds of control loop. Currently, REB1IS series isolator consists of passive isolator, active isolator, distribution isolator and power supply isolator, etc, which have been reliably applied for years in many industries, such as power, metallurgical, railway, petroleum, chemical, food, storage, communication, etc. And they have received widespread approval from users. REB1IS series isolator has following features.

- Two types of wide-range power supply: 15~60VAC/DC and 100~240VAC/DC
- Full-closed structure with highly shock resistance and high flame retardant rating
- It is easy to be installed and dissembled for din rail 32mm and 35mm.
- Damp proofing, salt-mist-resistant and fungus-resistant
- Output terminal has short-circuit protection
- Special circuit shielding technology ensures strong anti-interference capability.
- Low power consumption, low temperature drift and short response time
- conform to RoHS

REB1IS SERIES SIGNAL ISOLATOR

Feature

Accuracy grade	$\pm 0.2\%$ *
Temperature drift	$\leq 250 \text{ ppm}/^{\circ}\text{C}$
Insulation resistance	$\geq 100 \text{ M}\Omega$ (500VDC-1min)
Power frequency withstanding voltage	2kV/50Hz-1min(input-output) 2kV/50Hz-1min(input-power supply) 2kV/50Hz-1min(output-power supply)
EMC standards	GBT17626 IEC61326

* : Passive isolator accuracy: 0.5% , output load $\leq 500\Omega$

Output

Analog output	4~20mA, 0~20mA, 0~5V, 0~10V
Load	Current output: $\leq 750\Omega$; Voltage output: $\geq 2\text{k}\Omega$
Output protection	Short circuit protection
Max. output current	25mA

Power supply

Rated voltage	24VDC	15~60VAC/DC	100~240VAC/DC
Voltage range	24VDC $\pm 20\%$	15~60VAC/DC	85~265VAC/DC
Power consumption	$\leq 3\text{W}$	$\leq 3\text{VA}/3\text{W}$	$\leq 5\text{VA}/5\text{W}$

Condition

Operating temperature	-10°C~+55°C
Storage and transportation temperature	-25°C~+70°C
Relative humidity	5%~90%(no condensation and ice inside shell) ; When tempreture reaches +40°C~55°C , relative humidity of air is no more than 50%. High relative humidity is allowed in low temperature.
Atmospheric pressure	80 kPa~110 kPa , when altitude $\leq 2000\text{m}$.

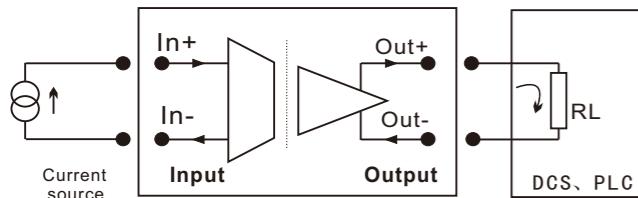

Overall dimension

Installation mode	RTR35/RTR32 Din rail installation
Size(width/ thickness/ height)	94/24/119mm(Single output), 94/34/119mm(Double output)
Weight	about 150g

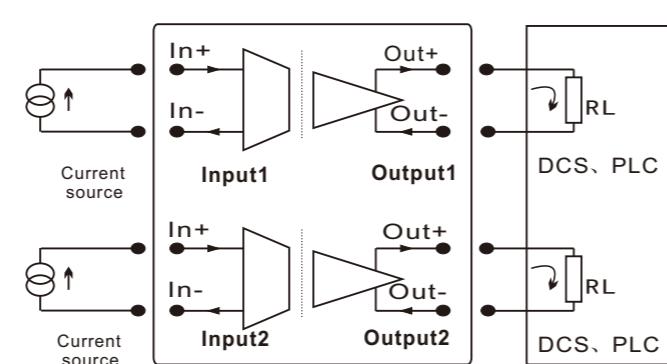

Tightening torque 0.8Nm

General Information

Non-electric physical quantity in industry environment are difficult to be transmitted and susceptible to be disturbed. Transmitters can collect physical quantity and precisely transform it into standard analog signal and reliably isolate interference, which credibly guarantees signal transmission of various kinds of control loop. RTA/RTV series current signal transmitter and voltage signal transmitter have been reliably applied for years in many industries, such as power, metallurgical, railway, petroleum, chemical, food, storage, communication, etc. And they have received widespread approval from users. RTA/RTV series have following features.

- Two types of wide-range power supply: 15-60VAC/DC and 100-240VAC/DC
- Full-closed structure with highly shock resistance and high flame retardant rating
- It is easy to be installed and dissembled for din rail 32mm and 35mm.
- Damp proofing, salt-mist-resistant and fungus-resistant
- Output terminal has short-circuit protection
- Special circuit shielding technology ensures strong anti-interference capability.
- Low power consumption, low temperature drift and short response time
- Conform to RoHS

RTP SERIES SIGNAL TRANSMITTER

Potentiometer signal transmitter

General Information

Non-electric physical quantity in industry environment are difficult to be transmitted and susceptible to be disturbed. Transmitters can collect physical quantity and precisely transform it into standard analog signal and reliably isolate interference, which credibly guarantees signal transmission of various kinds of control loop. RTP series potentiometer signal transmitter have been reliably applied for years in many industries, such as power, metallurgical, railway, petroleum, chemical, food, storage, communication, etc. And they have received widespread approval from users. RTP series have following features.

- ◆ Two types of wide-range power supply: 15-60VAC/DC and 100-240VAC/DC
- ◆ Full-closed structure with highly shock resistance and high flame retardant rating
- ◆ It is easy to be installed and dissembled for din rail 32mm and 35mm.
- ◆ Damp proofing, salt-mist-resistant and fungus-resistant
- ◆ Output terminal has short-circuit protection
- ◆ Special circuit shielding technology ensures strong anti-interference capability.
- ◆ Low power consumption, low temperature drift and short response time
- ◆ Conform to RoHS

Intelligent signal transmitter

General Information

Non-electric physical quantity in industry environment are difficult to be transmitted and susceptible to be disturbed. Transmitters can collect physical quantity and precisely transform it into standard analog signal and reliably isolate interference, which credibly guarantees signal transmission of various kinds of control loop. Based on configuration software in upper computer, RT2E series intelligent signal transmitter can input many kinds of signal, including current, voltage, potentiometer, frequency, temperature, etc. And it also can output programmable results. Users process setting in the upper computer, which makes different types of signal input and output. Process setting for the configuration type is to toggle the code switch, which realizes to change types of input and output signal. It has been reliably applied for years in many industries, such as power, metallurgical, railway, petroleum, chemical, food, storage, communication, etc. And they have received widespread approval from users. RT2E series have following features.

- Two types of wide-range power supply: 24VDC±20% and 100~240VAC/DC

Operating temperature	-10°C~+55°C
Storage and transportation temperature	-25°C~+70°C
Relative humidity	5%~90%(no condensation and ice inside shell); When temperature reaches +40°C~55°C , relative humidity of air is no more than 50%.
Atmospheric pressure	80 kPa~110 kPa , when altitude ≤2000m.

Overall dimension

Installation mode	RTR35 Din rail installation
Size(width/ thickness/ height)	121/23/110mm(Intelligent type) 121/33/110mm(Configuration type)
Weight	about 150g
Tightening torque	0.8Nm

1.2. Three-wire voltage input

Product Specifications

Intelligent signal transmitter

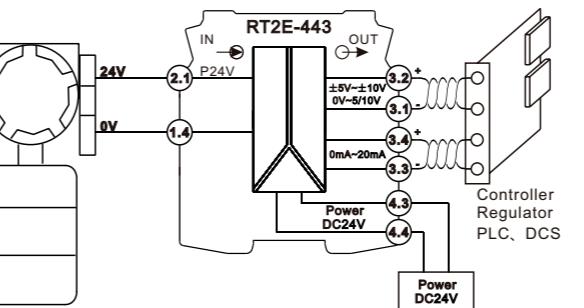

Ordering data

Type	Input signal	Output	Auxiliary power supply	Ordering No.
RT2E-443	Programmable	Programmable	24VDC	763152
RT2E-331	Voltage type	Configurable	100~240VAC/DC	763155

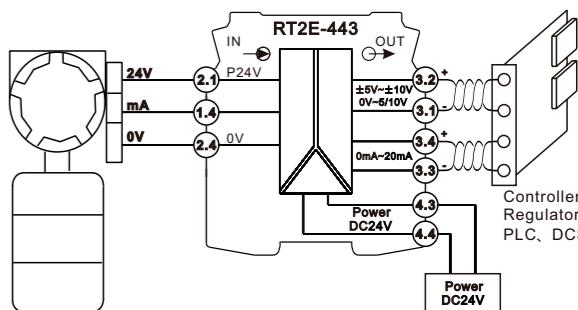

Connecting mode

1. Programmable type

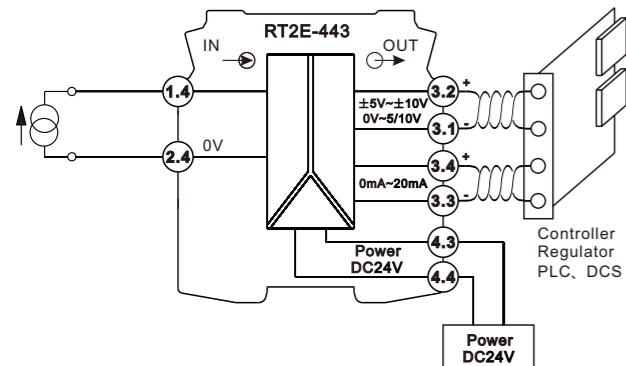

1.1. Two-wire voltage input

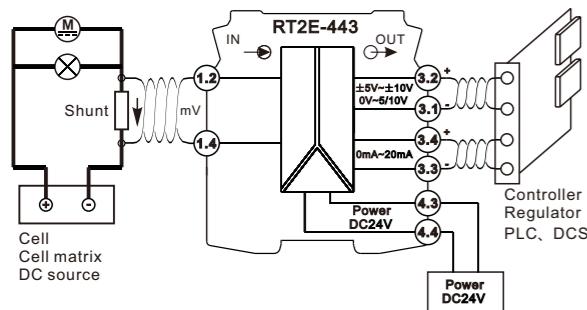

1.3. Three-wire current input

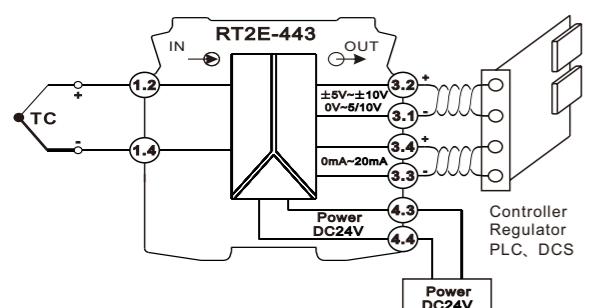

1.4、Current source measurement

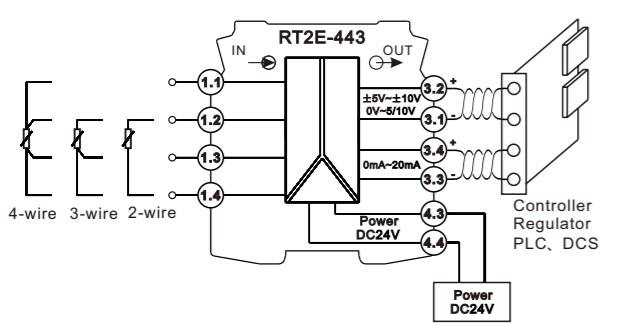

1.5、Millivolt signal measurement

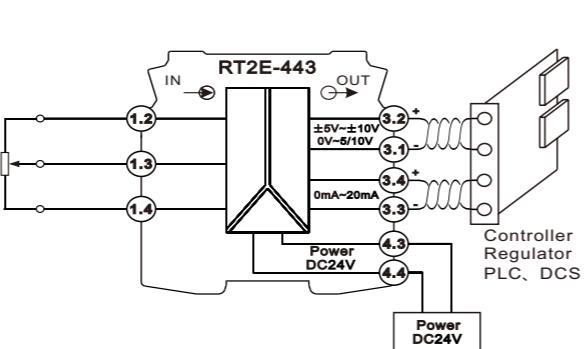

1.6、Thermocouple

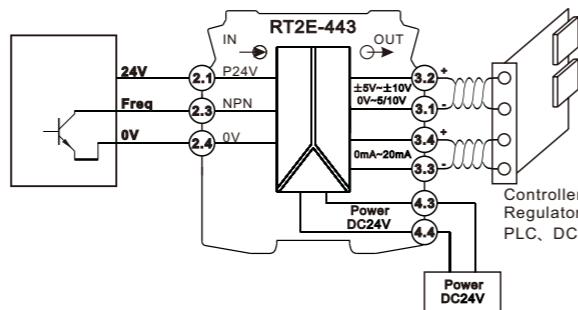

1.7、Thermocouple measurement

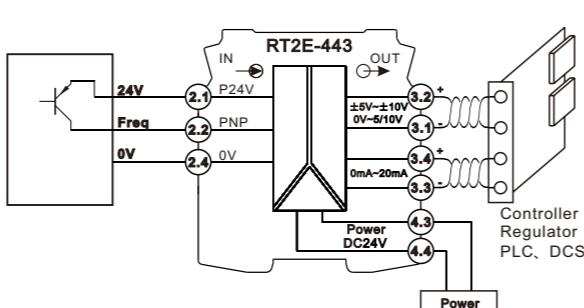

1.8、Potentiometer input measurement

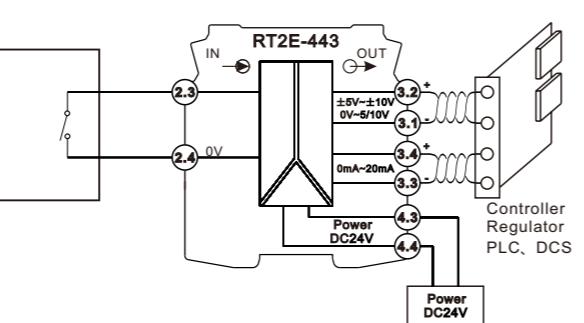

1.9、NPN transistor frequency input

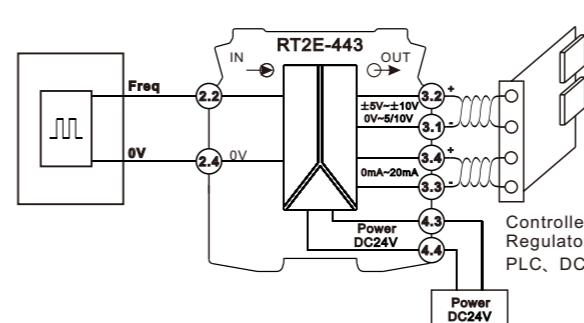

1.10、PNP Transistor frequency input

1.11、Dry contact frequency input

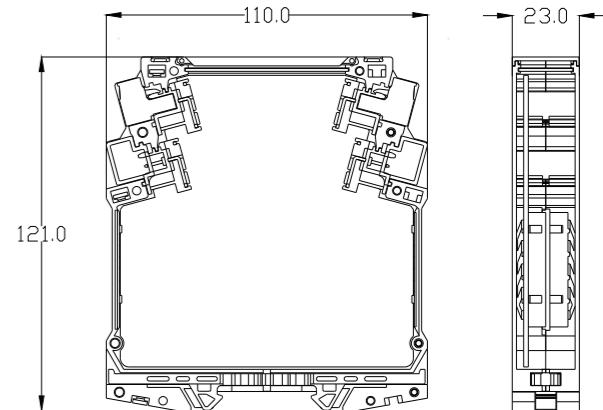

1.12、TTL frequency input

2.3、Configuration table

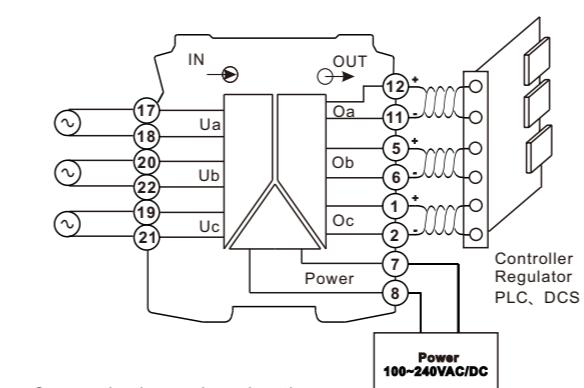

configuration table					
S1/S2/S3	1	2	3	4	5
Output	ON	ON	ON	ON	4-20mA
	ON	ON	ON	ON	0-20mA
	ON	ON	ON	ON	0-5V
	ON	ON	ON	ON	0-10V
Input	1	2	3	4	5-P 3-W

Overall Dimension

2、Configuration type

2.1、Connection diagram

2.2、Wiring system
